## 1. Package Contents

Thank you for purchasing PLANET Industrial 2-channel Optical Fiber Bypass Switch, IFB-244 Series. In the following section, the term "Optical Bypass Switch" means the IFB-244 Series.

The descriptions of these models are as follows:

| Models | Optic Connectors | Optic Mode | Optic Wavelength |
| :---: | :--- | :--- | :---: |
| IFB-244-SLC | $4 \times$ Duplex LC | Single Mode | $1310 \mathrm{~nm} \& 1550 \mathrm{~nm}$ |
| IFB-244-SSC | $4 \times$ Duplex SC |  |  |
| IFB-244-MLC | $4 \times$ Duplex LC | Multimode | 850nm \& 1300nm |
| IFB-244-MSC | $4 \times$ Duplex SC |  |  |

Open the box of the Optical Bypass Switch and carefully unpack it. The box should contain the following items:

If any of these are missing or damaged, please contact your dealer immediately; if possible, retain the carton including the original packing material, and use them again to repack the product in case there is a need to return it to us for repair.

## 2. Product Features

## Physical Port

- 2-channel duplex or 4-channel simplex fiber connection with optical bypass function
- Supports 100Gbps/40Gbps/10Gbps/1Gbps and 100Mbps fiber connections
- Available in Single mode or Multimode
- Available in LC/SC connectors

## Optical Bypass

- Bypass switch time $<8 \mathrm{~ms}$
- Low return loss
- Throughput not affected and no extra delay
- Increased reliability on critical network links

## Industrial Case and Installation

- IP30-rated metal housing
- $9 \mathrm{~V} \sim 48 \mathrm{~V}$ DC or 24 V AC redundant power inputs with reverse polarity protection
- Low power consumption
- Connective removable terminal block
- Supports 6000 VDC Ethernet ESD protection
- -40 to 75 degrees $C$ operating temperature
- DIN-rail and wall-mount designs
- Free fall, shock-proof and vibration-proof for industries

## 3. Product Specifications

| Model | $\begin{aligned} & \text { IFB-244- } \\ & \text { SLC } \end{aligned}$ | $\begin{aligned} & \text { IFB-244- } \\ & \text { SSC } \end{aligned}$ | $\begin{aligned} & \text { IFB-244- } \\ & \text { MLC } \end{aligned}$ | $\begin{aligned} & \text { IFB-244- } \\ & \text { MSC } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| Hardware Specifications |  |  |  |  |
| Optic Interfaces | $4 \times$ Duplex LC | $4 \times$ Duplex SC | $\begin{aligned} & 4 \times \text { Duplex } \\ & \text { LC } \end{aligned}$ | $\begin{aligned} & 4 \times \text { Duplex } \\ & \text { SC } \end{aligned}$ |
| Optic Mode | Single Mode |  | Multimode |  |
| Optic Wavelength | 1310nm \& 1550nm |  | 850nm \& 1300nm |  |
| Operating Wavelength | 1260~1620nm |  | $\begin{aligned} & 850 \mathrm{~nm} \pm 40 / \\ & 1300 \mathrm{~nm} \pm 40 \end{aligned}$ |  |
| Bypass Return Loss | >50dB |  | $>35 \mathrm{~dB}$ |  |
| Bypass Insertion Loss | Typical: 1.0dB Max: 1.5dB |  |  |  |
| Bypass Switching Time | <8ms |  |  |  |
| Speed | 100Gbps/40Gbps/10Gbps/1Gbps/100Mbps |  |  |  |
| ESD Protection | Air: 8kV, Contact: 6kV |  |  |  |
| Enclosure | IP30 metal case |  |  |  |
| Installation | DIN-rail kit and wall-mount kit |  |  |  |
| Connector | Removable 6-pin terminal block for power input Pin $1 / 2$ for Power 1, Pin $5 / 6$ for Power 2 Pin 3/4 for fault alarm, |  |  |  |
| Alarm | One relay output for power failure. Alarm relay current carry ability:1A@24V DC |  |  |  |
| LED Indicator | Power 1 (Green), Power 2 (Green), Fault (Red) Normal operation (Green) |  |  |  |
| Dimensions $(W \times D \times H)$ | $\begin{aligned} & 32 \times 87 \times \\ & 135 \mathrm{~mm} \end{aligned}$ | $\begin{aligned} & 50 \times 87 \times \\ & 135 \mathrm{~mm} \end{aligned}$ | $\begin{aligned} & 32 \times 87 \times \\ & 135 \mathrm{~mm} \end{aligned}$ | $\begin{aligned} & 50 \times 87 x \\ & 135 \mathrm{~mm} \end{aligned}$ |
| Weight | 405 g |  |  |  |

| Power <br> Requirements | Dual 9-48V DC with polarity reverse protection <br> function <br> 24 V AC |  |
| :--- | :--- | :--- |
| Power <br> Consumption | 0.54 watts/1.84BTU |  |
| Cabling | $9 / 125 \mu \mathrm{~m}$ | $50 / 125 \mu \mathrm{~m}$ |
| Standards Conformance |  |  |
| Regulatory <br> Compliance | FCC Part 15 Class A <br> CE |  |
| Stability Testing | IEC60068-2-32 (free fall) <br> IEC60068-2-27(shock) <br> IEC60068-2-6 (vibration) |  |
| Environment | Operating <br> Temperature | $-40 \sim 75$ degrees C |
| Storage <br> Temperature | $-40 \sim 85$ degrees C |  |
| Humidity | $5 \sim 95 \%$ (non-condensing) |  |

## 4 Hardware Introduction

### 4.1 Three-View Diagram

The three-view diagram of the Optical Bypass Switch consists of optical fiber connector and one removable 6-pin terminal block. The LED indicators are also located on the front panel.

Figure 4-1: IFB-244-SLC and IFB-244-MLC Three-View Diagram

Figure 4-2: IFB-244-SSC and IFB-244-MSC Three-View Diagram

Front View

Figure 4-3: IFB-244-SLC and IFB-244-MLC Front View

Figure 4-4: IFB-244-SSC and IFB-244-MSC Front View

### 4.2 LED Definition <br> ■ System

| LED | Color | Function |  |  |
| :--- | :--- | :--- | :--- | :---: |
| P1 | Green | Lit: | Power 1 is active. |  |
|  |  | Off: | Power 1 is inactive. |  |
| P2 | Green | Lit: | Power 2 is active. |  |
|  |  | Off: | Power 2 is inactive. |  |
| FAULT | Red | Lit: | Hardware indicates either Power 1 or Power <br> 2 has no power. |  |
|  |  | Off: | No failure. |  |

## STATE

| LED | Color | Function |  |
| :---: | :--- | :--- | :--- |
| Normal | Green | Lights: | To indicate the Bypass Switch is operating <br> in Normal mode with power input. |
|  |  | Off: | To indicate the Bypass Switch is operating <br> in Bypass mode with power failure. |

### 4.3 Wiring the Power Inputs

The upper panel of the Optical Bypass Switch indicates an inlet power socket and consists of one terminal block connector within 6 contacts. Please follow the steps below to insert the power wire.

1. Insert positive/negative DC power wires into Contacts 1 and 2 for Power 1, or Contacts 5 and 6 for Power 2. Figure 4-5 and 4-6 show PWR1 and PWR2 of the Optical Bypass Switch.

## IFB-244-SLC/IFB-244-MLC: 9~48V DC or 24V AC

Figure 4-5: IFB-244-SLC/IFB-244-MLC upper panel

■ IFB-244-SSC/IFB-244-MSC: 9~48V DC or 24 V AC

Figure 4-6: IFB-244-SSC/IFB-244-MSC upper panel
2. Tighten the wire-clamp screws for preventing the wires from loosening.

Figure 4-7: PWR1 \& PWR2 pins of terminal block.

When performing any of the procedures like inserting the wires or tightening the wire-clamp screws, make sure the power is OFF to prevent from getting an electric shock.

## 5. Hardware Installation

This section describes the functionalities of the Optical Bypass Switch's components and guides you to installing it on the DIN rail and wall. Please read this chapter completely before continuing.

### 5.1 DIN-rail Mounting Installation

### 5.2 Wall-mount Plate Mounting

### 5.3 Side Wall-mount Plate Mounting

### 5.4 Grounding the Device

Uses MUST complete grounding wired with the device; otherwise, a sudden lightning could cause fatal damage to the device. EMD (Lightning) DAMAGE IS NOT CONVERED UNDER WARRANTY.

## 6. Optical Fiber and Power Connections

### 6.1 Optical Fiber Connection

The IFB-244 series is equipped with a total of 4 duplex fiber connectors and they are separated into two groups - Remote Network channels and Local Switch channels.

■ Remote Network group has 2 fiber channels that are used to connect to the other two remote fiber Ethernet switches.

Local Switch group has 2 fiber channels that are used to connect to the local fiber Ethernet switch.

■ Connecting to the Remote Network with Duplex Fiber cables

To Remote Switch A's TX

- Connecting to the Local Switch

To Local Switch C Port 1's TX

To Local Switch C Port 2 's TX

■ Connecting to the Remote Network with Simplex Fiber Cables (WDM/ $\mathrm{Bi}-\mathrm{di})$

## To Remote Switch A's

- Connecting to the Local Switch

### 6.2 Power Connection

The IFB-244 Series is expected to be powered from the same power source as the Local Switch to ensure power system failure makes the IFB-244 Series change to Bypass mode. Make the IFB-244 Series share the same power source as the Local Switch.

### 6.3 Recovering Communication from Power Failure

| Operation <br> Mode | Power <br> Source | State LED | Optical Traffic Route |
| :--- | :--- | :--- | :--- |
| Normal <br> Mode | Power on | Normal <br> LED lit on | IFB-244 forwards packets between <br> two remote network switches and <br> the local switch. |
| Bypass <br> Mode | Power off | Normal <br> LED lit off | IFB 244 directly forwards packets <br> between two remote networks <br> switches and bypass the local <br> switch. |

- Normal Mode

- Bypass Mode

## Customer Support

Thank you for purchasing PLANET products. You can browse our online FAQ resource on PLANET web site first to check if it could solve your issue. If you need more support information, please contact PLANET switch support team.

## EC Declaration of Conformity

For the following equipment:
*Type of Product : Industrial 2-channel Optical Fiber Bypass Switch
*Model Number : IFB-244-SLC, IFB-244-MLC, IFB-244-SSC, IFB-244-MSC

* Produced by:

Manufacturer's Name : Planet Technology Corp.
Manufacturer's Address : 10F., No.96, Minquan Rd., Xindian Dist., New Taipei City 231, Taiwan R.O.C.
is herewith confirmed to comply with the requirements set out in the Council Directive on the Approximation of the Laws of the Member States relating to Electromagnetic Compatibility Directive on (2014/30/EU).

For the evaluation regarding the EMC, the following standards were applied:

EN 55032
EN 55024
EN 55035
$(2015+\mathrm{AC}: 2016)$
$(2010+\mathrm{Al}: 2015)$
(2017)

Responsible for marking this declaration if the:
区 ManufacturerAuthorized representative established within the EU
Authorized representative established within the EU (if applicable):
Company Name: Planet Technology Corp.
Company Address: 10F., No.96, Minquan Rd., Xindian Dist., New Taipei City 231, Taiwan R.O.C.
Person responsible for making this declaration
Name, Surname Kent Kang
Position / Title: Director
